Subject: Dominion Federation of NZ Chinese Commercial Growers Submission

The Dominion Federation of New Zealand Chinese Commercial Growers Committee wishes to express its support for J&P Turner Limited's proposed acquisition of T&G Fresh, subject to the necessary regulatory approvals.

- The T&G and Turners & Growers names have a long history in New Zealand's horticulture industry. This proposed acquisition is an important opportunity for the business to return to the Turner family, whose history and involvement in the New Zealand produce industry goes back many generations.
- Our Committee believes the proposed acquisition has the potential to provide a positive future for the New Zealand fresh produce industry. T&G Fresh has been an important part of the industry for many years, working with growers, suppliers, wholesalers, retailers and other businesses throughout New Zealand.
- We believe it is important for the industry to have owners who understand the challenges of growing, supplying and marketing fresh produce in New Zealand. The horticulture industry faces many challenges, including rising costs, labour shortages, changing market conditions, weather events, regulatory requirements and pressure on growers' returns.
- We hope that under the Turner family's ownership, T&G Fresh will continue to invest in the industry, maintain strong relationships with growers, support local production and provide opportunities for New Zealand growers to remain competitive and sustainable.
- The Dominion Federation of New Zealand Chinese Commercial Growers has a long history of representing and supporting New Zealand Chinese growers. We recognise the importance of having a strong and sustainable domestic produce industry, where growers have access to markets, fair trading opportunities and confidence in the future.
- We support the proposed acquisition and believe the return of T&G Fresh to the Turner family provides an opportunity to build on its history while looking towards the future of New Zealand horticulture.
- We look forward to seeing continued investment, strong relationships with growers and a positive future for the New Zealand fresh produce industry.
