Subject: RE: Request for submissions on service specification for mobile termination regulation

Anthony,

Ihug will not be responding to this request for submission, because we don't agree at all with the underlying premise that 3G voice calls should escape price regulation. This is a fundamentally wrong position to take and will be impossible to achieve without significant opportunity for 2G voice calls to also escape price regulation. This is a meaningless & unnecessary distinction that will lead to chaos in implementation. The commission needs to go back to the drawing board on this issue.

Regards, David
