CHANGE TO CUBS2

Telecom is writing to you to advise that it will provide you with an amended commercial UBS service specification that enables you to seek a regulatory application for regulated services that are not the same or substantially similar to the ones you are currently receiving.

As part of a confidential settlement of matters between Telecom and ihug and Telecom and Callplus, Telecom has agreed:

- Callplus and ihug will take up the commercial UBS package that the rest of the industry is on. This is on the same terms and conditions as the rest of the industry except that;
- Callplus and ihug are able to pursue their pending regulatory application for a regulated unconstrained UBS as set out in Decision 568; and
- Callplus and ihug have agreed not to seek a regulatory application for UBS variants that are the same or substantially similar to those they are receiving commercially.

As they are now on the same package with an amended term, we consider it is also appropriate for Telecom to flow through the amended terms to the rest of our customers.

This change will be articulated in an amended UBS service specification to be sent to you shortly.

In the meantime, if you have any questions, please contact me.

Yours faithfully
