Dear Neville

Applications for Reconsideration of Decision 582 (UBS Reconsideration)

We refer to the UBS conference, scheduled for Friday 20 April 2007. You have asked the parties to provide the Commission with copies of presentations two working days prior to the conference.

Telecom does not intend to make any further written submissions. We will speak to the points identified in the conference agenda.

We enclose copies of the following data that we will be relying on in the conference:

- Network diagram
- Pricing used by Xnet (part of WorldxChange) for its data usage product. Xnet offers a pure linear data product – every Mbyte from the first to the last is charged at the same rate, meaning that that rate can be used as a direct indication of price without the need for adjustment for issues such as unused Gbytes, utilisation factors etc. This information has been sourced from WorldxChange's website: <http://www.xnet.co.nz/hsi/> and <http://www.xnet.co.nz/legal/terms.shtml> (last accessed on 17 April 2007).

We look forward to seeing you at the conference on Friday.

Yours sincerely

A handwritten signature in blue ink that reads "Lucy Riddiford".
