

2025 Transpower individual price-quality path: Final amendment determination to the Transpower Individual Price-Quality Path 2025, related to the delivery risk adjustment reopener

Stakeholder notification email 4 December 2025

Tēnā koutou,

Today, we have published our amendment determination increasing Transpower's expenditure allowances and forecast maximum allowable revenue in accordance with the delivery risk adjustment reopener.

In approving the adjustment, we are satisfied that Transpower's application has met the requirements in the Transpower IPP and Transpower IMs.

Transpower has provided reasonable evidence showing its eligibility for an increase to its expenditure allowances. It has provided a summary of the number of FTEs by business division for both employee and contractor FTEs demonstrating it has been able to exceed its target FTEs.

The amendment determination is available [here](#).

Ngā mihi,
Matthew Clark
Manager, Transpower and Gas team
Commerce Commission
