Cross submission: Draft recommendation report for the Deregulation of Voice FFLAS

Enable welcomes the opportunity to cross submit on submissions to the *Draft recommendation report for the Deregulation of Voice FFLAS*.

Enable notes Spark and One NZ both submitted that the Commerce Commission (Commission) should not be considering individual services, such as voice, co-location, transport etc. Instead the Commission should consider a broader set of services and consider the totality of the effects of deregulation.¹

Enable does not agree with this argument and supports the Commission's current approach. Part 6 specifically envisages a deregulation review of one or more fibre services, and the Commission has described in previous papers how its approach is appropriate and consistent with the Telecommunications Act.

¹ One NZ, *Submission on draft framework for fibre deregulation reviews and draft recommendation on fibre Voice services* 27 November 2025, page 2, and Spark, *Submission on draft framework for fibre deregulation reviews and draft recommendation on fibre Voice services* 27 November 2025, page 2
