Questions for the audience

We want the audience to tell us:

- Is unwarranted complexity and compliance costs in the IMs a significant issue for you?
- Are we correct in identifying the four issues in the problem definition paper?
- Are there other significant examples in this issue that we should be looking at?

Questions for the audience (2)

We want the audience to tell us:

- Are the issues for the gas sector largely similar to electricity distribution and electricity transmission on this?
- What should we consider when assessing whether there is a problem with unwarranted complexity and compliance costs in the IMs?

Questions for the audience (3)

We want the audience to tell us:

- Is there an approach to easier and more workable alternatives than making changes to the IMs to solve these issues?
